

1. A personal image information recording/outputting system comprising:

personal data inputting means for classifying personal information on said photographic image datum, which is read by said photographic image reading means, to input the classified personal information as a personal datum;

use consent advisability registering means for registering advisability of permission for third parties to use said photographic image datum which is read by said photographic image reading means; and

wherein said photographic image managing means manages said photographic image datum so that a photographic image datum, which has been registered so as to give permission for third parties to use the photographic image datum, among a plurality of photographic image data which has been read by said photographic image reading means, can be taken out by persons concerned with an owner of the registered photographic image datum or third parties.

2. A personal image information recording/outputting system as set forth in claim 1, wherein said photographic image reading means, said personal data inputting means, said use consent advisability registering means and said output means are provided in a store server, and said photographic image managing means is provided in a center server which is connected to said store server via a network.

7. A personal image information recording/outputting system as set forth in claim 6, wherein said photographic image reading means and said output means are provided in a store server, and said advertisement image managing means is provided in an advertisement server which is connected to said store server via a network.

8. A personal image information recording/outputting system as set forth in claim 6, further comprising fee paying means for executing a fee paying processing, wherein said output means outputs said photographic image datum together with said advertisement image datum after said fee paying processing is executed by said fee paying means.

9. A personal image information recording/outputting system as set forth in claim 6, further comprising personal data inputting means for classifying personal information on said photographic image datum, which is read by said photographic image reading means, to input the classified personal information as personal datum,

wherein said advertisement image managing means retrieves and extracts an advertisement image datum on the basis of said personal datum which is inputted by said personal data inputting means.

10. A personal image information recording/outputting system as set forth in claim 6, wherein said photographic image reading means reads a photographic image datum, which has been picked up by a digital camera to be stored in a data storage medium, from said data storage medium.

11. A personal image information recording/outputting system as set forth in claim 6, wherein an output matter outputted from said output means is a printed matter on which a photographic image and an advertisement image are laid out in accordance with a predetermined format.

12. A personal image information recording/outputting method comprising the steps of:

- reading a photographic image datum;
- registering advisability of permission for third parties to use the read photographic image datum;
- storing a photographic image datum, which is registered

outputting the read photographic image datum.

14. A personal image information recording/outputting method comprising the steps of:

selecting and extracting an advertisement image datum meeting required conditions, from a plurality of advertisement image data which has been stored in a data base; and

outputting the read photographic image datum, together with the extracted advertisement image datum.
